SUMMARY

Aspiring AI Engineer and Full Stack Developer with hands-on experience in building intelligent systems and scalable web applications. Strong foundation in Data Structures, Operating Systems, and Database Management Systems, complemented by practical knowledge.

EDUCATION

B.E – Artificial Intelligence and Machine Learning December 2022 – June 2026

BLDEA's V.P. Dr. P.G. Halakatti College of Engineering and Technology, Vijayapura

CGPA: 8.55 / 10.0 (Till 6th Semester)

EXPERIENCE

AI Engineer Intern – Texiri Solutions, Vijayapura May – August 2025

- Developing an AI-driven solution for lease contract analysis leveraging OCR, NLP, and RAG pipelines.
- Enhancing workflow integration to improve accuracy and minimize manual contract validation time.

Full Stack Developer Intern – Technologies Global Pvt Ltd (Remote) Feb – May 2025

- Built CampusConnect web app using MERN stack with modules like forums, lost & found, and complaints.
- Developed scalable backend APIs using Express and MongoDB, enabling seamless data operations.
- Focused on modular architecture and responsiveness using Bootstrap and React components.

AI/ML Intern – Eyesec Cyber Security Solutions Pvt. Ltd. (Remote) Jul – Aug 2023

- Developed an ML model to predict concrete compressive strength from mix proportions and age.
- Achieved a model precision of 92%, reducing the need for manual quality control in construction.
- Improved prediction reliability using feature scaling and RMSE-based optimization.

PROJECTS

AI-Powered Interactive Robot (NAIN 2.0) May 2024 – Present

- Building a voice-controlled robot integrating computer vision for object detection and face tracking.
- Used OpenCV for vision pipelines and spaCy for intent recognition and natural voice response.
- Part of the Karnataka Government's NAIN 2.0 initiative to drive innovation in smart systems and automation.

CollabSync – Client-Service Management Web Application May 2025

- Developed a full-fledged web app for service providers and clients to manage tasks, communication, and analytics.
- Implemented role-based dashboards, Firebase authentication, task assignment, and real-time updates using Firestore.
- Designed an interactive analytics dashboard; styled with Tailwind CSS and built with React + TypeScript.

IntelliScreen – AI-Based Job Screener Mar 2025

- Designed an NLP-based system to match candidate resumes with job descriptions using TF-IDF and cosine similarity.
- Integrated LLM (Gemma:2b) for intelligent resume summarization and relevance scoring.
- Developed a clean and interactive UI using Streamlit to automate parsing, shortlisting, and interview scheduling.

TECHNICAL SKILLS

Programming Languages: Python, SQL, C

AI/ML: Scikit-learn, XGBoost, NLP, BERT, Seaborn, RAG, OCR

Data Science: Statistics, EDA, Dimensionality Reduction, Visualization, Feature Engineering, Evaluation, VectorDB(Basics)

Web Development: MongoDB, NodeJS, ReactJS, JavaScript, Streamlit

Tools & Platforms: GitHub, Firebase, Ollama, Cursor, VS Code, NumPy, Pandas, Power BI

CERTIFICATIONS & ACHIEVEMENTS

- **2nd Place** – DBMS Mini Project Exhibition July 2024
- Power BI Job Simulation – PwC Forage August 2024
- Virtual Agent Developer – IBM TechXchange January 2025
- Machine Learning Foundations – Wolfram February 2025
- Large Language Models with BERT – LinkedIn Learning March 2025
- Participated in **30-hour National Hackathon "HackVyuha 2025"** May 2025

LEADERSHIP

Head of Media — IEEE Student Branch, BLDEACET May 2024 – December 2024

- Spearheaded media strategy and content creation, amplifying event publicity and significantly boosting student engagement.
