EDUCATION

Alva's Institute of Engineering and Technology

2022 - present

B.E - Computer Science and Engineering - **CGPA - 8.0** (until 6th sem)

Moodbidri, Karnataka

Kumbhashree English Medium School, Venur

2019 - 2020

SSLC - **Percentage - 82.08%**

Venur, Karnataka

PROJECTS

College Payment Portal (Java EE) | Java, JSP, Servlet, MySQL, JDBC

2025

- Designed and implemented a **full-stack fee management system** with secure role-based access.
- Integrated **JWT authentication**, MySQL transaction logging, and responsive JSP/Servlet-based user interfaces.
- Automated **receipt generation** workflows, reducing manual intervention and errors.

Syntheia - Gamified Habit Tracker | React.js, Vite, Tailwind CSS

2025

- Developed a **habit tracking platform** with gamification, progress rewards, and streak-based achievements.
- Implemented a **focus mode** timer that prevents tab switching, encouraging distraction-free productivity.
- Built modular UI using **React hooks, custom components, and Tailwind CSS**, optimized for performance with Vite.

Koswo's Last Day (Unity) | Unity, C#, 2D Game Development

2025

- Created a **2D endless runner** with parallax scrolling, predator AI, and dynamically generated obstacles.
- Programmed core mechanics in **C#**, including power-ups, score tracking, and adaptive difficulty scaling.
- Published and distributed on **Itch.io**, gaining user feedback and iterating on improvements.

PUBLICATIONS

IEEE Conference

July 2025

3rd International Conference on AI & Machine Learning (AIMLA-2025)

On-site

- Published and presented a review paper titled "**A Comprehensive Review on Blockchain in Computing: Integration with Cloud, Edge, and Fog Systems**".
- Explored how **blockchain can enhance security, transparency, and trust** in decentralized computing environments.
- Reviewed real-world use cases, identifying research gaps and proposing potential **hybrid blockchain frameworks** for distributed systems.
- Collaborated in literature review, architecture evaluation, and comparative analysis, contributing to discussions on **next-generation secure computing**.

TECHNICAL SKILLS

Languages: Java, Python, C#, C, JavaScript

Web Development: React.js, Tailwind CSS

Database: MySQL

Game Development: Unity (2D), C# Scripting

DevOps: Git, Github

Tools: VS Code, Unity Editor

ACHIEVEMENTS & CERTIFICATIONS

- Solved **170+** problems on **LeetCode** and **400+** on **CodeChef**, demonstrating strong problem-solving and algorithmic skills.
- Selected in the **SAP StateHub Hackathon** round, among **399** teams across India, showcasing teamwork and innovation.
- Earned industry-recognized **ServiceNow** and **Salesforce** badges, validating adaptability to enterprise platforms and CRM solutions.
- Certifications: Learning React with Redux and Flux, React Case Study - Web App Development, Database Management System Part - 1 & Part - 2, ReactJS.
